

EVO IV to VIII & SUBARU WRX-STI 1999 – 2000 ECU INJECTOR OUTPUT CURRENT SELECTION

Early ECUs (Revs A & B) are fitted with fixed current Injector Drivers (attached to heatsink. Subaru ECU shown, EVO ECUs have same attachment). Drive current cannot be changed in the field. Contact

Late ECUs (Revs C & D) are fitted with current selectable switching type Injector Drivers. When a jumper link is fitted between pins 1 & 2 of JP2 drive current is low (2A peak / 0.5A hold). When a jumper link is removed drive current is High (4A peak / 1A hold).

NOTE: This product is usually supplied with the correct drivers or driver jumpering to suit the OEM injectors of the intended application. Driver change or jumpering change may be required if non original injectors are installed
